PROFESSIONAL SUMMARY

QA-focused BS Information Technology graduate (Cum Laude) with hands-on Magento 2 testing and PHP development experience. Documented 100+ UI defects across four e-commerce websites, revalidated 50+ fixes during regression testing, and built a Magento 2 admin module. Seeking a QA Analyst or Junior QA Engineer role.

EDUCATION

BS Information Technology (Cum Laude), San Beda College Alabang 2022 – 2026
Coursework: Application Development, Database Management Systems, Web System and Technology, Capstone and Research
Honors: Dean's Lister (AY 2022–2024; 1st Sem AY 2025–2026); Dean's Annual Honor Roll (AY 2022–2024)

TECHNICAL SKILLS

QA Tools	Jira, Zephyr Scale, Qase, Trello
Testing & QA	Manual, Functional, UI/Visual, Responsive & Regression Testing; Test Case Design; Defect Reporting & Tracking; SDLC
Programming Languages	PHP, Python, Java, C#
Databases	SQL, MySQL, SQL Server
Web Technologies	HTML5, CSS3, JavaScript, Bootstrap
Tools & Platforms	Magento 2, Docker, Git/GitHub, VS Code, XAMPP, SQL Server Management Studio (SSMS)

WORK EXPERIENCE

PHP/QA Intern | 1902 Software Development Corporation Jan 2026 – May 2026
Magento 2, PHP, Docker, MySQL

- Executed UI visual testing across four Magento 2 e-commerce websites, validating 50+ web pages for layout, responsiveness, and usability against design specifications.
- Identified and documented 100+ UI defects through staging and production validation and design comparison, allowing developers to resolve issues before deployment.
- Revalidated 50+ reported defects after fixes and flagged recurring issues during regression testing.
- Built a Magento 2 admin module in PHP with CRUD operations, custom routing, access control, database integration, and an administrative grid.

PROJECTS

Hydrolink: Blockchain-Powered Smart Water Distribution System (Capstone)
Team of 3 | HTML, CSS, JavaScript, Bootstrap, PHP, MySQL

- Built the frontend interfaces and dashboards for a four-role system (Admin, Attendant, Client, Sponsor), fetching and displaying MySQL data for consumption, refill, transaction, and sponsorship records.
- Developed the PHP operations for each role: application approval and rejection, user management, audit logging, inquiry handling, QR-based water dispensing, and client and sponsor applications with file uploads.
- Implemented session-based role access control, CSRF-protected forms, and QR code authentication; assisted in testing and debugging.

SBCA Clinic Management System
PHP, MySQL, HTML, CSS, Git/GitHub

- Developed the Student Health Records module with full CRUD operations and search for a web-based school clinic system.
- Built the Vaccinations module to record and update student vaccination data, including multi-dose dates, findings, and treatment.
- Implemented secure admin login with hashed passwords, failed-login tracking, and session-based access control; designed the admin dashboards.

CERTIFICATIONS

IT Specialist (Certiport): Software Development, Java, Python, Databases, HTML & CSS	2023 – 2025
Cisco: Data Science Essentials with Python; CCST (IT Support, Cybersecurity, Networking)	2025 – 2026
Microsoft Certified: Azure Data Fundamentals; Azure Fundamentals	2024 – 2025
PMI Project Management Ready (valid through 2031); CompTIA IT Fundamentals (ITF+)	2023 – 2026
